

Printing Your Return in TurboTax

Want to see the tax returns you've been working on so diligently? You'll definitely have a chance to print or view your return **coming up in just a few screens**. We recommend holding off until then.

If you're e-filing, look for the **Want To See a Copy Before E-filing?** screen. If you're printing and mailing your return, you'll print it out shortly and be able to check it over before mailing.

If you want to print **right now**, go to the **Print Center** at the top right of your screen, and choose to print a copy for your records.
